INDEX

TO THE

ISSUES OF 1922

OF THE

QUARTERLY JOURNAL.

A.

	Page.
Ageratum	7
albuminoids in tea leaf	45
analysis of typical tea soils	144
Arhar	7
ash constituents of tea leaf	45
Autumn quality of tea, influence of rate of growth on———	16, 17

B.

Banjhi-ness, causes of———	20
bheel soils, typical———	152
Black Rot, treatment of———	123
Blister Blight	35
Blister Blight, presence of———in jungle ...	36
„ „ , treatment of———	42, 43
Boga medeloa	7
bone meal compared with flour phosphates ...	108
Burgundy mixture	165
„ „ and Blister Blight	40

C.

Caffeine	44
„ and tannin, combined	40, 100
cell sap, concentration of———and plant growth ...	17
Chalsa District, soils of———	79

C—(*continued.*)

	PAGE.
climate, influence of———on Blister Blight ...	35
,, and plant, relationship between——— ...	10
clay soils, typical———	150
correlation, degree of ——— , definition ...	14
,, between constituents of tea leaf ...	135
,, factor	139
Cowpeas, manuring experiments on——— ...	22
crickets, a note on———	113
critical period of annual crops	11
,, ,, ,, tea	11
cultural conditions, influence of——on Blister Blight	36

D.

Daina Toorsa District, soils of ———	82
,, to Rehti District, soils of———	82
degree of wetness, significance of———	12
,, ,, ,, , table of———	12
Dhaincha	7
Dooars, notes on the new alluvium of——— ...	75

E.

Exobasidium vexans (Blister Blight)	35
expressor, Perman's, note on use of——— ...	183

F.

Fermentation, the———process	69
firing, the———process	72
,, , machines, temperature control of——— ...	33
flushes, tea———during season	11
,, , ,,———Tocklai during 1921 ...	19, 20
forking, as alternate to hoeing	8
fungi, distribution of———	162
fungus diseases of the tea leaf	35
,, ,, , manurial treatment of——— ...	161
,, ,, prevalent during 1922	114

G.

	PAGE.
Green crops, experiments on the manuring of———	22
gummy substances in tea leaf	45

H.

Hantapara Plateau, soils of———	86
hoeing, benifits from———	2
„ , cessation of———during rains ...	4
humidity, absolute———	174
„ , influence of———on transpiration ...	16
„ , relative———	174
hydrometer, the———	166
Hygrograph Charts	176

J.

Jat of tea and Blister Blight	35
jungle, harmful effect of———on tea ...	5
„ as a "catch crop"	6
„ and tilth improvement	6

K.

Kherani and Blister Blight	36

L.

Leaf diseases, treatment of———	163
leguminous plants as "Catch crops"	7
lime as a preserver of fertility	26
lime-sulphur solution	40

M.

Magnesia, effect of———on cowpeas ...	31
Mal District	75
"Mal Sand"	76
manures, effect of———on constitution of tea plant	125

M—(*continued.*)

	PAGE.
manuring for Blister Blight	39
„ of Green crops, experiments on the———	22
medium soils, typical———	154
Meteorological Chart for 1921	20
„ „ „ 1922	182
„ observations in Assam 1921 ...	10
„ „ „ „ 1922 ...	168
monsoon in Assam during 1921	11
„ „ „ „ 1922	169

N.

Nagrakata District, soils of———	80
nitrates, washing out of———	7
nitrogen, variation of———in tea leaves ...	132

O.

Oil, essential———of tea leaf	44, 72

P.

Packing, the———of tea	73
pan formation	3
parasitic fungi in relation to tea plant	160
Perman's expressor, note on use of——— ...	183
phosphates, flour———compared with bone meal	108
„ , variation in———content of tea leaves ...	134
plucking and Blister Blight	41
potash manures, effect of———on cowpeas ...	31
„ , variation in———content of tea leaves ...	132
pruning and Blister Blight	41

Q.

Quality of tea factors affecting the——— ...	44-74

R.

	PAGE.
Radiation, influence of————on crop ...	16
rainfall, monthly————at Tocklai 1921 ...	12
„ , „ ———— „ „ 1922 ...	171
rains cultivation	1–9
Rhododendron forests and Blister Blight ...	38
rolling, the————of tea leaf	67
root diseases, treatment of————	163

S.

Sand cultures	127
sandy soils, typical	144–150
seedlings, tea, effect of manures on———— ...	127
shade, effect of————on tea	7
„ , „ „ ————on jungle	6
sickling as alternative to hoeing	8
soil, class of————and susceptibility of bush to Blister Blight	35
„ condition at Tocklai during 1921	18
„ „ „ „ „ 1922	179
soils, analysis of typical tea————	144
sorting, the————of tea	73
spray fluids	164
spraying machines	166
„ for Blister Blight	40
stem diseases, treatment of————	163
sunshine records	177
superphosphates, influence of——— on cowpeas crop	25
Surma Valley clay flats	6
Symplocos theœfolia (Kherani) and Blister Blight ...	36

T.

Tannin, chemical nature of tea———— ...	63
"tannin brown"	54, 55
"tannin red"	54, 55
tannin in tea leaf	45
„ and caffeine, combined	46
„ content of Indian, China and Ceylon teas ...	99
„ , influence of————on quality of tea ...	46

T—(*continued.*)

	PAGE.
tannin, influence of jat, plucking, pruning, light, manuring on———in tea leaf ...	58–61
„ , observations concerning———in the tea leaf	99
„ , variation in———content of leaf ...	56, 102, 105
tea crop, effect of temperature on——— ...	15
„ „ at Tocklai during 1921	19
„ „ „ „ „ 1922	180
„ leaf, fungus diseases of the——— ...	35
tea, factors affecting the quality of——— ...	44–74
„ flowers, infusion of———	124
„ leaf, the constituents of the——— ...	44
teelas and slopes, loss of soil on———during rains	8
temperature and vapour pressure, relation between——	15
„ and growth of plants	15
„ and humidity	172
„ control of firing machines	33
„ , ideal———for tea growth	16
tilth, loss of———from rains hoeing	2
"tipping," influence of———on crop... ...	11
timber, preservation of———	33
Toorsa-Jainti District, soils of	91
toxicity of jungle	5
transpiration, influence of vapour pressure on ———	14
trenching during rains	4

V.

Vapour pressure, definition of———	13
„ „ , factors influencing——— ...	14
„ „ , effect of———on tea crop ...	14
variation between constitution of tea bushes ...	130
Vigna catiang (cowpeas), manuring experiments on——	24

W.

Wetness, degree of———	11
wind, influence of———on crop	16
withering and wilting of tea leaf	17
„ , the———process	63–67
wounds on tea bushes, treatment of——— ...	121
